Second Application

Minimum of 3 weeks after Initial Application \$80-\$95

Coating Boost

Handwash and Coating Boost \$50-\$65

Hyper-Vision

Front Glass Polish & Coating \$165

SERVICE MENU

Affordable Auto Coating

Initial Application

2 & 4 Door Cars: 2-Day Service \$415
Vans, SUVs and Wagons: 3-Day Service\$485

Process: Handwash, Clay Mitt, 1-Step Paint Correction, IPA Wipedown, Application of Coating, Drying

Second Application

2 & 4 Door Cars \$80
Vans, SUVs and Wagons\$95

Process: Handwash, IPA Wipedown, Application of Coating, Drying

Recommend to wait 6 months to 1 year after initial application. Must bring in your unused portion of the initial bottle. We will apply all remaining contents with focus on the hood, roof and trunk. Second Application is absolutely not necessary, but it will create a thicker barrier and deepen gloss.

Handwash and Coating Boost

2 & 4 Door Cars \$50
Vans, SUVs and Wagons\$65

Process: Handwash, Application of Coating Booster

We use Adam's Graphene Boost which is designed to extend the life of ceramic coatings. For all cars with existing coatings...even if it wasn't coated by us!

Hyper-Vision - Front Glass Polish and Coating

All Cars \$165

Process: Clean Inside, Handwash Outside, IPA Wipedown, Optical Polish, Apply Adam's Glass Coating

Includes: Premium PIAA Hydrophobic Wiper Blades & Glaco Wiper Fluid

We use a combination of optical-grade cerium oxide and diamond polish to remove most wiper-travel marks, micro pitting, and fine scratches. This is then protected by Adam's Glass Coating. Finally, PIAA Hydrophobic wipers and Glaco wiper fluid are applied. Greatly improves vision and safety in inclement weather and nighttime driving.

Initial application requires an appointment and pre-payment.

Please call 637-2191 for more information or stop by the Kinser Typhoon Motors for a FREE consultation.
GOVs / NTVs Welcome
GCPC Accepted. 889 not required.

Paint Correction: The removal of oxidation, swirl and spider-webbing from the paint by machine application of a compound or polish to restore a like-new finish. This refreshed and stripped-bare surface is now ready to accept a coating for long term protection. We will use either Meguiar's M110 or M210, but not both, in a single corrective step. These "Ultra Pro" versions cost more but the performance is unmatched. You can choose which you prefer, or our Auto Detailer can decide. **Note, we do not offer multi-step correction.**

The Coating: We use Adam's 9-Year Graphene Ceramic Coating.

FULL TRANSPARENCY: Nothing lasts 9 years on Okinawa. While we make no claims in its durability, we have found this coating greatly outperforms others under Okinawa's heat, sun and salt. Additionally, many shops use bulk containers with stale contents and apply it thin to maximize profit. Not us! We open a fresh new bottle on every application and apply it thick. We then give you the bottle with all of the unused portion when we are done. (We recommend storing it in your refrigerator. One bottle is usually enough to do 2-3 cars depending on the size.)
